## Experience

### MSK Ambulatory Care

I was the first administrator of this new department and created the program from the ground up writing the handbook of daily tasks, billing protocol, bracing scheduling, referral intake, ODSP invoices, etc. I spent a year creating a smooth process for a busy fracture clinic seeing upward of 50 patients per day.

### MSK Acute Injury Clinic

In fall of 2023, I was tasked with creating the new Acute Injury Program. Once again, I troubleshoot the processes necessary to run a smooth clinic, coordinate multiple emergency medicine physicians, billing systems and custom bracing payments.

### Textbook Editor - Western University

During my last year at Western, I completed a 4 month work study program in the span of 2 months as I worked directly with a professor to format and edit a textbook/workbook for beginner Arabic learners. The English sections had to be detailed and exact to relay the intended meaning.

### Writing Tutor/Workshops

Near the end of my undergrad I offered writing/editing services to current students where I would provide insights to improve their writing in both content and structure. I had many repeat clients who gained confidence in writing and even increased their writing grades upward of 20% by the end of the term. I would primarily help non-humanities students with their mandatory essay course content. I also helped review med school applications for cohesivity and structure.

## Education

### Western University / Bachelor of Arts - London, Ontario

I began my degree in vocal music and transferred to Arts and Humanities in my second term to pursue English Language and Literature. Other areas of study included History, Woman's Studies, Philosophy, Environmental Science, Astronomy.
